

TECHNOLOGICAL OFFER

- The Pilot Line can be used to:
- Develop smart composite parts.
 - Perform in-line control of 100 % product.
 - Apply non-destructive testing technologies.

COMPETITIVE PRODUCTS

- Large smart composite parts.
- Functionalised materials.
- 100 % quality controlled.
- Short cycle time.

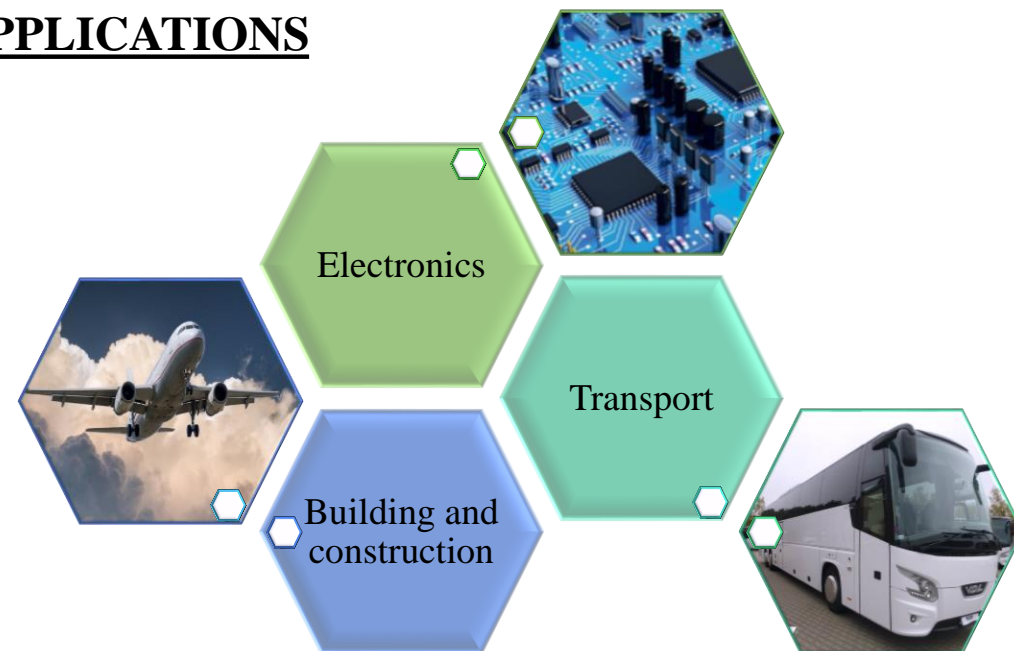

UPGRADED TECHNOLOGY

- Implementation of thermography equipment enabling pulse and lock-in thermography in cycle time.
- In-line control with terahertz technology.

APPLICATIONS

Open access single entry point for scale-up of innovative Smart lightweight composite materials and components
 This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 814581
