

TECHNOLOGICAL OFFER

FXply™ Prepreg Technology enables conventional prepregs to deliver additional functionalities such as:

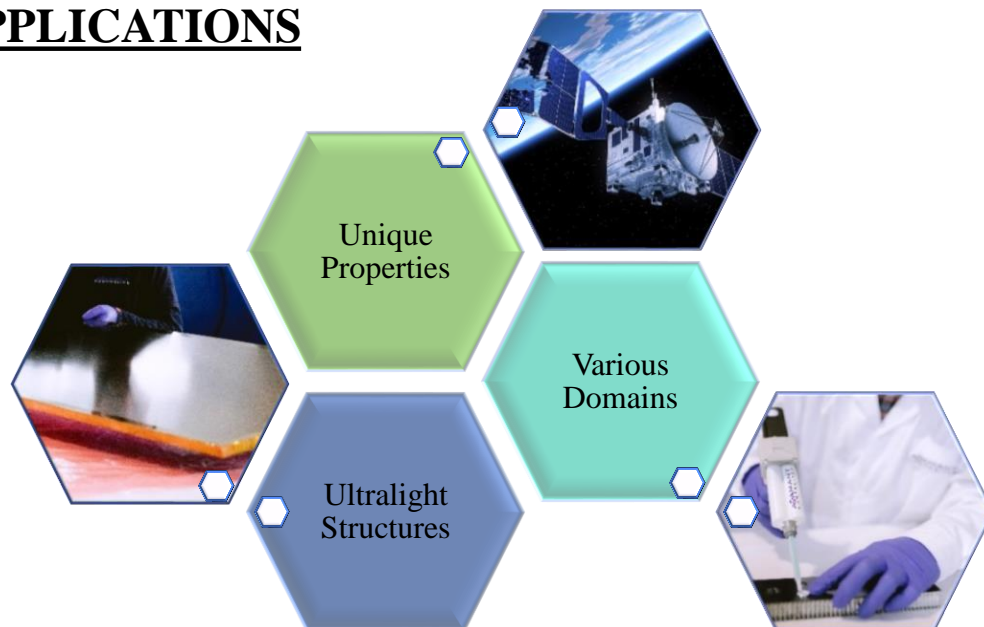

- Toughness
- Electrical Conductivity
- Thermal Conductivity

COMPETITIVE PRODUCTS

- Ultralight materials.
- Composite materials with enhanced properties.
- Tailored composite products.

APPLICATIONS

UPGRADED PILOT LINE

- Full automated and traceable production with increased robustness & quality while having decreased operational costs.
- Improved Quality Control via Camera Visual Inspection (Machine Vision).
- Fully controlled manufacturing process through dedicated production space with industrial levels of cleanliness, where the conditions are monitored constantly.
- Improved H&S in terms of H&S instrumentation & Scatterer enhancements.
